

Campus Evacuation Drills!!

April 2010

AS Child Development Lab, Chico State University

The CSUC campus has developed a campus wide Emergency Preparedness and Management Plan. The ASCDL has had and is required to have an Emergency Plan. However, to assist in the coordination and cooperation of the CSUC plan, the ASCDL has modified our evacuation routes to align with CSUC plan. In May (date has not been determined) **CSUC will be conducting a campus wide Emergency Drill. The ASCDL will be included in this drill.** As a result the teachers and children of the ASCDL we will be taking walks to the “primary rally” points. The new rally point for the ASCDL is in the amphitheater in front of the new Gateway Science Museum. The teachers will be giving you notices about the walks. These walks are necessary and mandatory to prepare the children for not only the May drill but in the event of an actual emergency. If you have any questions please discuss with your teacher or contact me in the office. It our intention not only to prepare the children in the event of an emergency but to do so in a way that is fun and appropriate to their age level.
