**BALLOT ADVISORY MEASURE**

Should the Associated Students promote student and environmental safety by opposing the transportation of crude oil by rail through the City of Chico and the Feather River Canyon by encouraging the California State Student Association (CSSA) to formally oppose the construction or expansion of crude oil rail facilities in the State of California?

☐ YES
☐ NO

**Impact Statement Prepared by Wildcats Against oil Trains**

Wildcats Against Oil Trains is calling attention to the nationwide issue of crude oil transported by rail by encouraging Chico State University, one of the most sustainable campuses in the nation, to oppose the transportation of crude oil by rail through Butte County and the Feather River Canyon. Should Chico State stand in opposition to crude oil by rail, it would become the first CSU to do so and set a precedent for other campuses. Crude oil by rail poses an immediate threat to Student Safety, Environmental Protection, and intensifies Climate Change. Students should not fear for their life every time a train carrying dirty, explosive oil comes barreling through our city. With the rapid rise of crude oil by rail across the country, now is the perfect time to start lobbying with other CSU’s to oppose this dangerous practice. By Voting YES on April 12, you as an individual can take action to promote a safer and greener world and campus.
